# Kurva Gaming Official Rules

**Most rules have a singular warning threshold (Different punishments will be clarified). When you exceed that threshold, you receive a 24 hour ban, another offense is a 3-day ban, then a 1-week ban, after this threshold has been crossed, you will receive either a 1-month ban or permanent ban depending on staff discretion.**

# Discord Rules

**Most Discord rules start with a singular warning (Different punishments will be clarified) of either a verbal or written warning at staff discretion. The proceeding punishments follow: you will receive a 1-3 hour mute, then a 24 hour mute, after this threshold has been crossed, you will receive a ban. Not listening to Discord Staff/disrespecting staff may result in punishment.**

## Do Not:

- Breach the Discord TOS

- Spam (Mass-reposting and text spam included, and spam joining VCs) or spam ping anyone, including ghost pinging and mass pinging roles without cause

- Excessively loud media is only allowed when a volume disclaimer is added with the video. *[Examples include a written disclaimer or a spoiler on the video]*

- Excessively loud content isn't allowed in general VCs or in private VCs *[it is up to the people in the call to allow it or not prior to stating a volume warning]*

- Advertising without being in #advertising *[1st offense is written warn, 2nd offense is a 24 mute, 3rd is a ban]*

- Post material that can compromise the discord app for other users (this includes discord crashing gifs or malicious external links)

- Send a post outside of its appropriate channel

- Misuse google forms (Such as sending "joke" staff applications)

- Purposefully attempt to or drive off members *[1st offense is a warn, 2nd offense is a ban]*

- Show yourself using drugs

- Keep discord voice/text chats topic related. If you are in a specific game's chat, and a majority of the group isn't playing that game, they will be asked to move

before directly moved by a moderator. Members still not cooperating may be muted.

## SCP:SL Rules

*For our rules on roleplay, please click [Here](#)*

- If a player that is under the age of 13 is causing problems caused by their age, such as being the victim of multiple targeted tks or immaturely breaking rules, they may receive a year ban, or be banned for up to when they would no longer be under 13 years old.

- Verbally inform teammates in the potential blast radius that you are throwing a grenade either before or directly after you throw it.

- Detaining D-class/scientists does not make them switch teams until they escape, and while killing them is not advised, **IT IS ALLOWED**. However, If a Chaos/NTF member attacks or kills a detained scientist/D-class, that member is considered to be a saboteur and is allowed to be teamkilled to defend/avenge the detained member within **25 seconds** of the original attack/kill. However, the detainer is allowed to kill **THEIR OWN** detainee without consequence.

## Do Not:
- Delay the rounds by sitting in a room, purposely avoiding confrontation *[If camping in an area for more than a minute and a warning is provided to move, the camper can be despawned.]*

- Team with Chaos or SCP as MTF/Facility Guards or vice versa

- Glitch or exploit mechanics in the game to gain an advantage

- Stream-snipe or use 3rd party software to gain an advantage in game

- Intentionally team kill or attempt to team kill unless all parties agree (Self-defense, even if the victim was only shot once, **is allowed**, and unintentional crossfire doesn't count) or if the team kill falls within the [acceptable excuses](#).

- Leave a server with the intention to avoid bans or punishment *[will up the punishment by one degree]*

- Purposefully suicide as an SCP (i.e. Leaving and rejoining before becoming or after becoming a zombie. Leaving is allowed as long as the reason for leaving is justified). *[Leaving for a moment to receive a delivery is **NOT** a justifiable reason].*

- Team grief (Example: Stealing items in 914 or after an ally escapes, purposefully bleed your teammate, etc).

- Uncuff a D-Class as MTF/Facility Guard right before escaping *[Doing so will allow you to be teamkilled within 25 seconds]*

- Spawn camp for longer than a minute.

- Intentionally AFK as an SCP and/or purposefully go into an inescapable area. (Example: Intentionally AFK as an 049-2 to be replaced).

- Lie to staff if confronted in any way *[Doing so will increase the original ban length by one degree]*

## Clarifications and Exceptions

- If an individual has broken a rule warranting a ban or kick, but has become an SCP, the offender will be punished accordingly and a random non-staff individual will be picked to replace their spot. If the first pick declines, staff will pick another until someone is chosen.

- SCP:SL warnings are both universal across all rules and permanently in effect, meaning that they do not wear off over time. Breaking two rules that warrant a warning before a ban will result in a ban, regardless of when they were given or if they were the same rule or not. *[This may be changed if the original warning was from long ago depending on staff discretion]* If multiple rules are broken in the same instance then the punishment will be cumulative. *[ex. If an individual teamkills and then lies about it, both of those offense would combine to jump in the next step of the ban ladder]*

- All punishments will be based off of and continued from a previous record if present.

- 2 teamkills within 1 minute of each other are punishable by a 1-day ban.

- 3 or more teamkills within 1 minute of each other is considered a "mass teamkill" which will result in an instant 3-day ban.

- "Delaying" can apply to more than one individual at a time. Individuals who delay for 1 minute will be ordered to cease, further noncooperation/delaying will be despawned.

- Closing doors on teammates will result in a despawning after a warning, but only if excessive (10 or more).

**These rules are subject to change at any time. Community members are responsible for keeping updated with rules and following them, claiming ignorance is not an appropriate excuse for breaking rules. In addition, though this document outlines how the majority of incident cases should be handled, staff actions can be adapted to specific situations, and final decisions can be altered case by case to the staff's discretion.**
